The main purpose of this platform is:

to facilitate the access to architectural services offered by consecrated architects from Central and Eastern Europe to global clients. At the same time, this project tends to expand the geographic area where users who are looking for architectural or design projects can identify professionals in the field willing to offer their services. It operates in Central and Eastern Europe, AB Plus events being the promoter of this concept through organized SHARE events. The platform also combines an eCommerce platform for limited-range objects, manufactured by local architects and designers, that are made available to customers- a novelty in this area. At the same time, the platform is helping architects with recruiting young specialists who are able to perform activities under guidance.

CCA-CEE

Consultative Council of Architects in Central and Eastern Europe

ARTICLE 17

SHARE conferences become the perfect occasion to discuss common and specific issues regarding the built environment in Central and Eastern Europe. In this context, SHARE Bucharest 2017 set the premises of a regional organization of architects, members of the architects national chambers and the most representative professional association in the region, which later became the Consultative Council of Architects in Central and Eastern Europe CCA-CEE. The CCA - CEE met officially during the first Serbian edition of the SHARE International Architecture and Engineering Forum in Belgrade, on April 23rd, at the headquarters of the Union of Architects of Serbia.

The founding members of this council are **Armand VOKSHI**, President of the Albanian Architects' Association, **Borislav IGNATOV**, President of the Chamber of Architects in Bulgaria, **Evangelos LYROUDIAS**, Representative Member of the President of the Technical Chamber of Greece, **Astrit NIXHA**, President of the Association of Architects of Kosovo,

ARTICLE 18

Another relevant point of view raised by all present members in Belgrade was the necessity and the imperative of an open society aiming to bring together and join forces with as many architectural associations in Central and Eastern Europe as possible – in order to create an association of leaders – and this implies all the strength and decisiveness, awareness and ethics, professionalism and representativeness such a professional entity can embody for its goals to become relevant on an international level. Therefore CCA-CEE extends an invitation to other leaders of local, regional or national architecture associations to take part in this dialogue opened from now on between CCA-CEE founding members
